

INDUSTRIAL TECHNOLOGY

Machines. Technology. Automation

Number 6, November 2019

When 40 years of history are combined with 25 years' experience

EFFIND has been on European and worldwide market for many years serving oil & gas (onshore and offshore), chemical and petrochemical, naval and power-energy industries. EFFIND manufactures and trades flanges according to the main international norms, connections for piping, tube sheets as well as special items according to drawing in all sizes and ratings, in the following grades: carbon steel, stainless steel, alloy steel, duplex and super duplex, nickel alloys. EFFIND can also manufacture particulars used in the heat exchangers and pressure vessels and also deals with the most common full package items (elbows, tees, fittings, gaskets, stud-bolts, tube-sheets, closure for valves, headers for heat exchangers). EFFIND is expert in the supply of components to main refineries all over the world.

Within this new organization, EFFIND brings together a team of experts with over twenty years' experience in the supply of components for the oil & gas sectors (onshore and offshore), petrochemical and chemical plants, mechanical and power-energy industries. This team can boast considerable know-how in the sector, and can offer its clients the best consultancy on supplies and the most efficient commercial services, both pre- and post-sales. Their specialization in the sector is supported and complemented by over four decades of managerial experience from Simeon Carpenterie srl, the founding member of the Simeon group which EFFIND belongs to.

OUR SIX WORKING STAGES

In our company, work is organized with a 360° approach

EFFIND

THE TEAM FOR PIPING SOLUTIONS

to our clients' needs. Experience has taught us that in order to guarantee maximum celerity in our processes, it is essential that we can control and manage the entire production cycle ourselves, from the design stage right through to delivery of the finished job. This means having a complete overview of the process as a whole, and at the same time, considerable mastery in order to handle each individual stage. In a nutshell, versatility and specialization in mechanical processes.

EFFIND can produce flanges to international standards or to design, starting from the purchase of the raw material from reputable suppliers, processed on latest-generation machinery, guaranteeing the traceability of its products with specific markings and the respect of contractual quality conditions, and using strict visual and dimensional

controls, carried out before packaging. Packaging itself is guaranteed for land, sea and air transportation, and upon completion, all products can be certified to standard EN 10204/3.1 or 3.2 by authorized inspection agencies on request.

OUR RANGE OF PRODUCTS

An extremely broad range of products, flexibility, efficiency and rapid service, the ability to meet additional needs regarding testing or special packaging: all this makes EFFIND the ideal partner for companies working in the creation of technical systems for chemical and petrochemical industries worldwide.
